David Kim

Senior Python & Backend Engineer

david.kim@example.com | +1 (555) 345-6789 | Austin, TX

PROFESSIONAL SUMMARY

High-performing Python Developer and Backend Architect with 6+ years of expertise designing mission-critical distributed systems. Proven track record in high-throughput API design, backend performance tuning, and scalable cloud architectures using Python, Django, and Flask.

CORE TECHNICAL SKILLS

Python ? Django ? Flask ? API ? Backend ? PostgreSQL ? Redis ? Docker ? Microservices ? Celery

PROFESSIONAL EXPERIENCE

Staff Backend Engineer · FinTech Cloud Solutions 2021 - Present

- ? Spearheaded core backend infrastructure processing 15M+ daily requests using Python and Django.
- ? Designed and maintained low-latency REST and GraphQL API services using Flask and FastAPI.
- ? Engineered async background task processing pipelines with Celery and Redis.
- ? Optimized database queries and backend microservices reducing server latency by 35%.

Python Developer · Apex Data Systems 2018 - 2021

- ? Built secure authentication and transaction logging API endpoints in Django.
- ? Maintained internal developer tools and automation scripts written in Python.
- ? Collaborated with frontend teams to define clean API schemas and data contracts.

EDUCATION & CREDENTIALS

B.S. in Software Engineering - University of Texas at Austin (2018)
